Introduction

Web application

CDN

Custom domains and TLS

Traffic Manager

Global deployment

A First Look at the Web Application

Internationalcookies.eu

ASP.NET Core

Azure Web App

Demo

Create the website

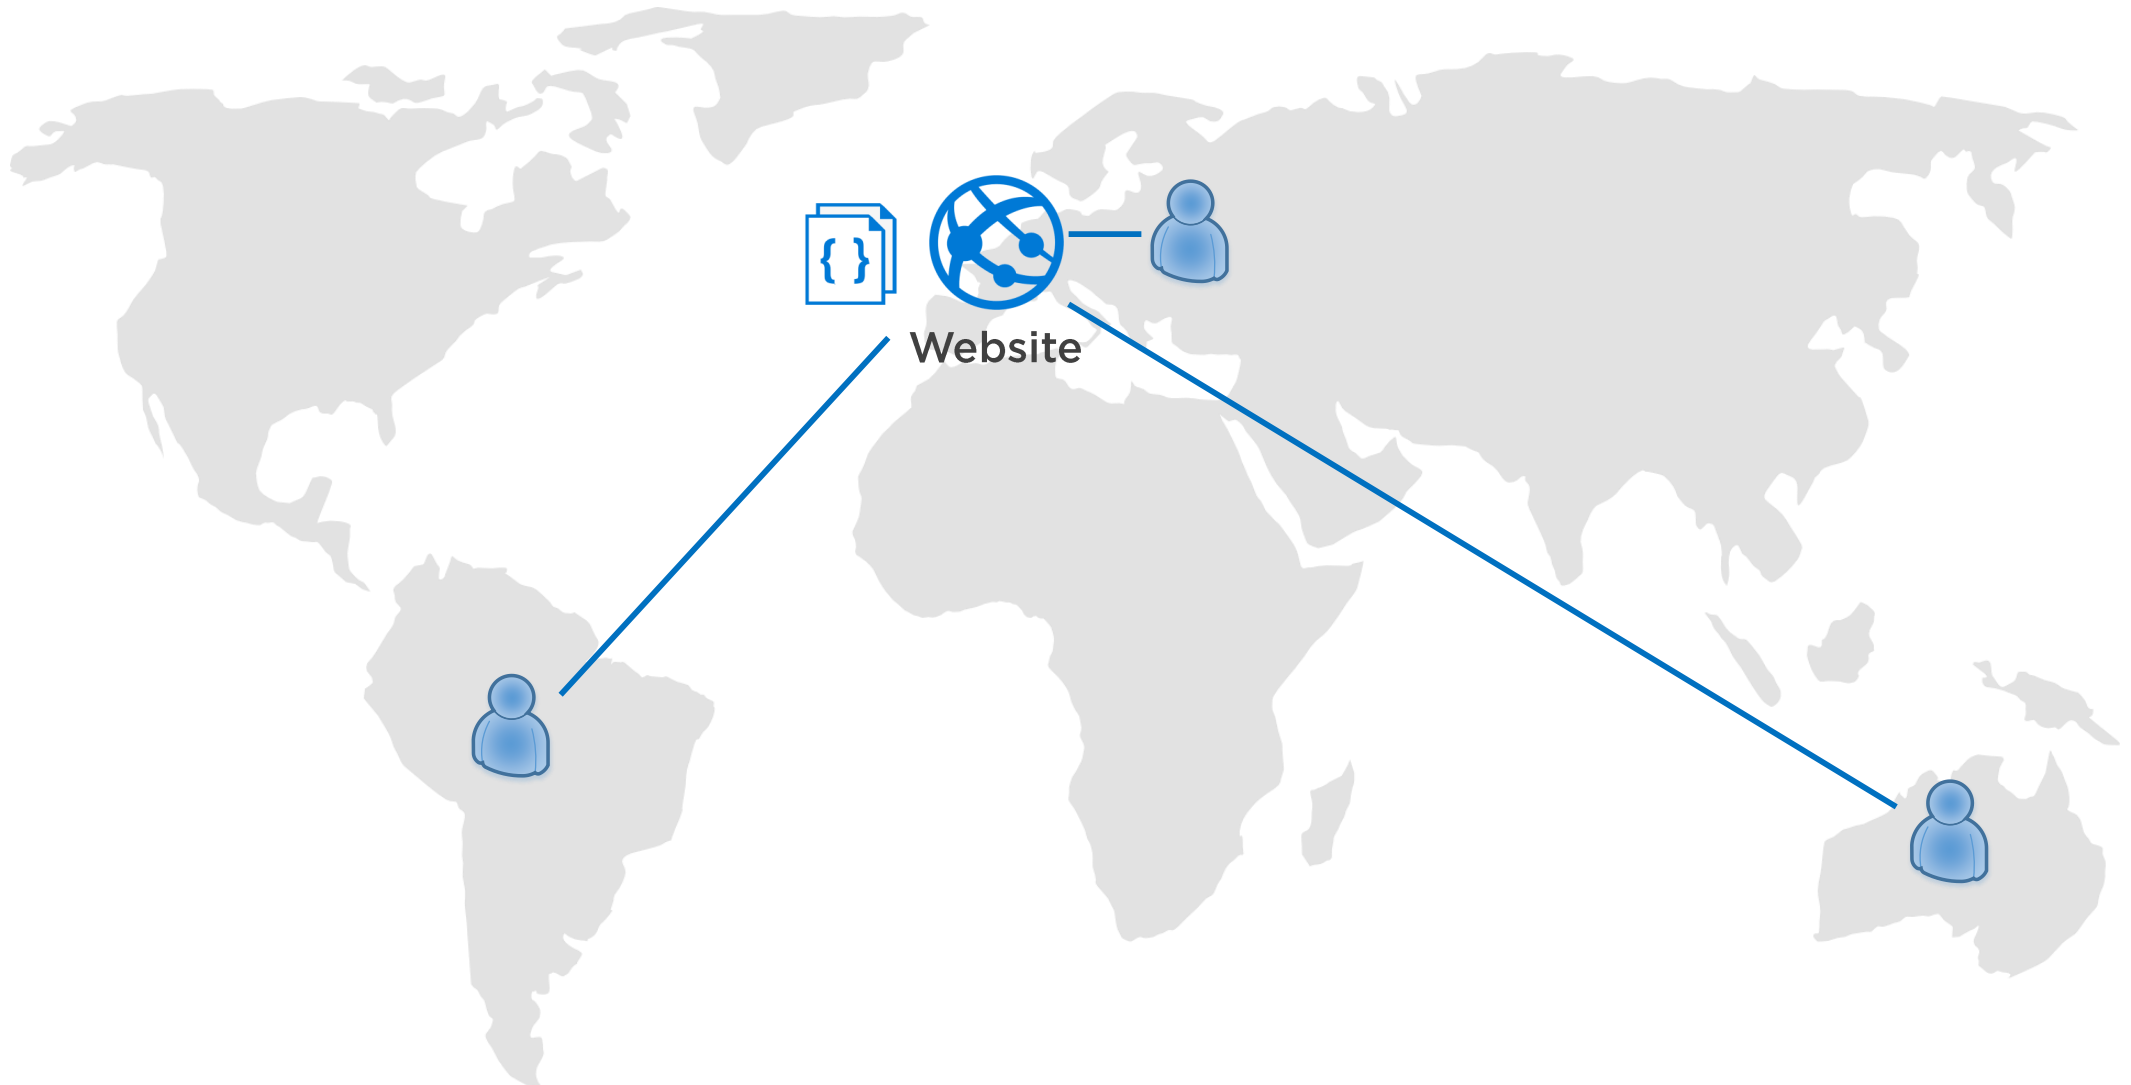

Publish it to Azure

Implement CDN to Speed up Our Website

What is CDN?

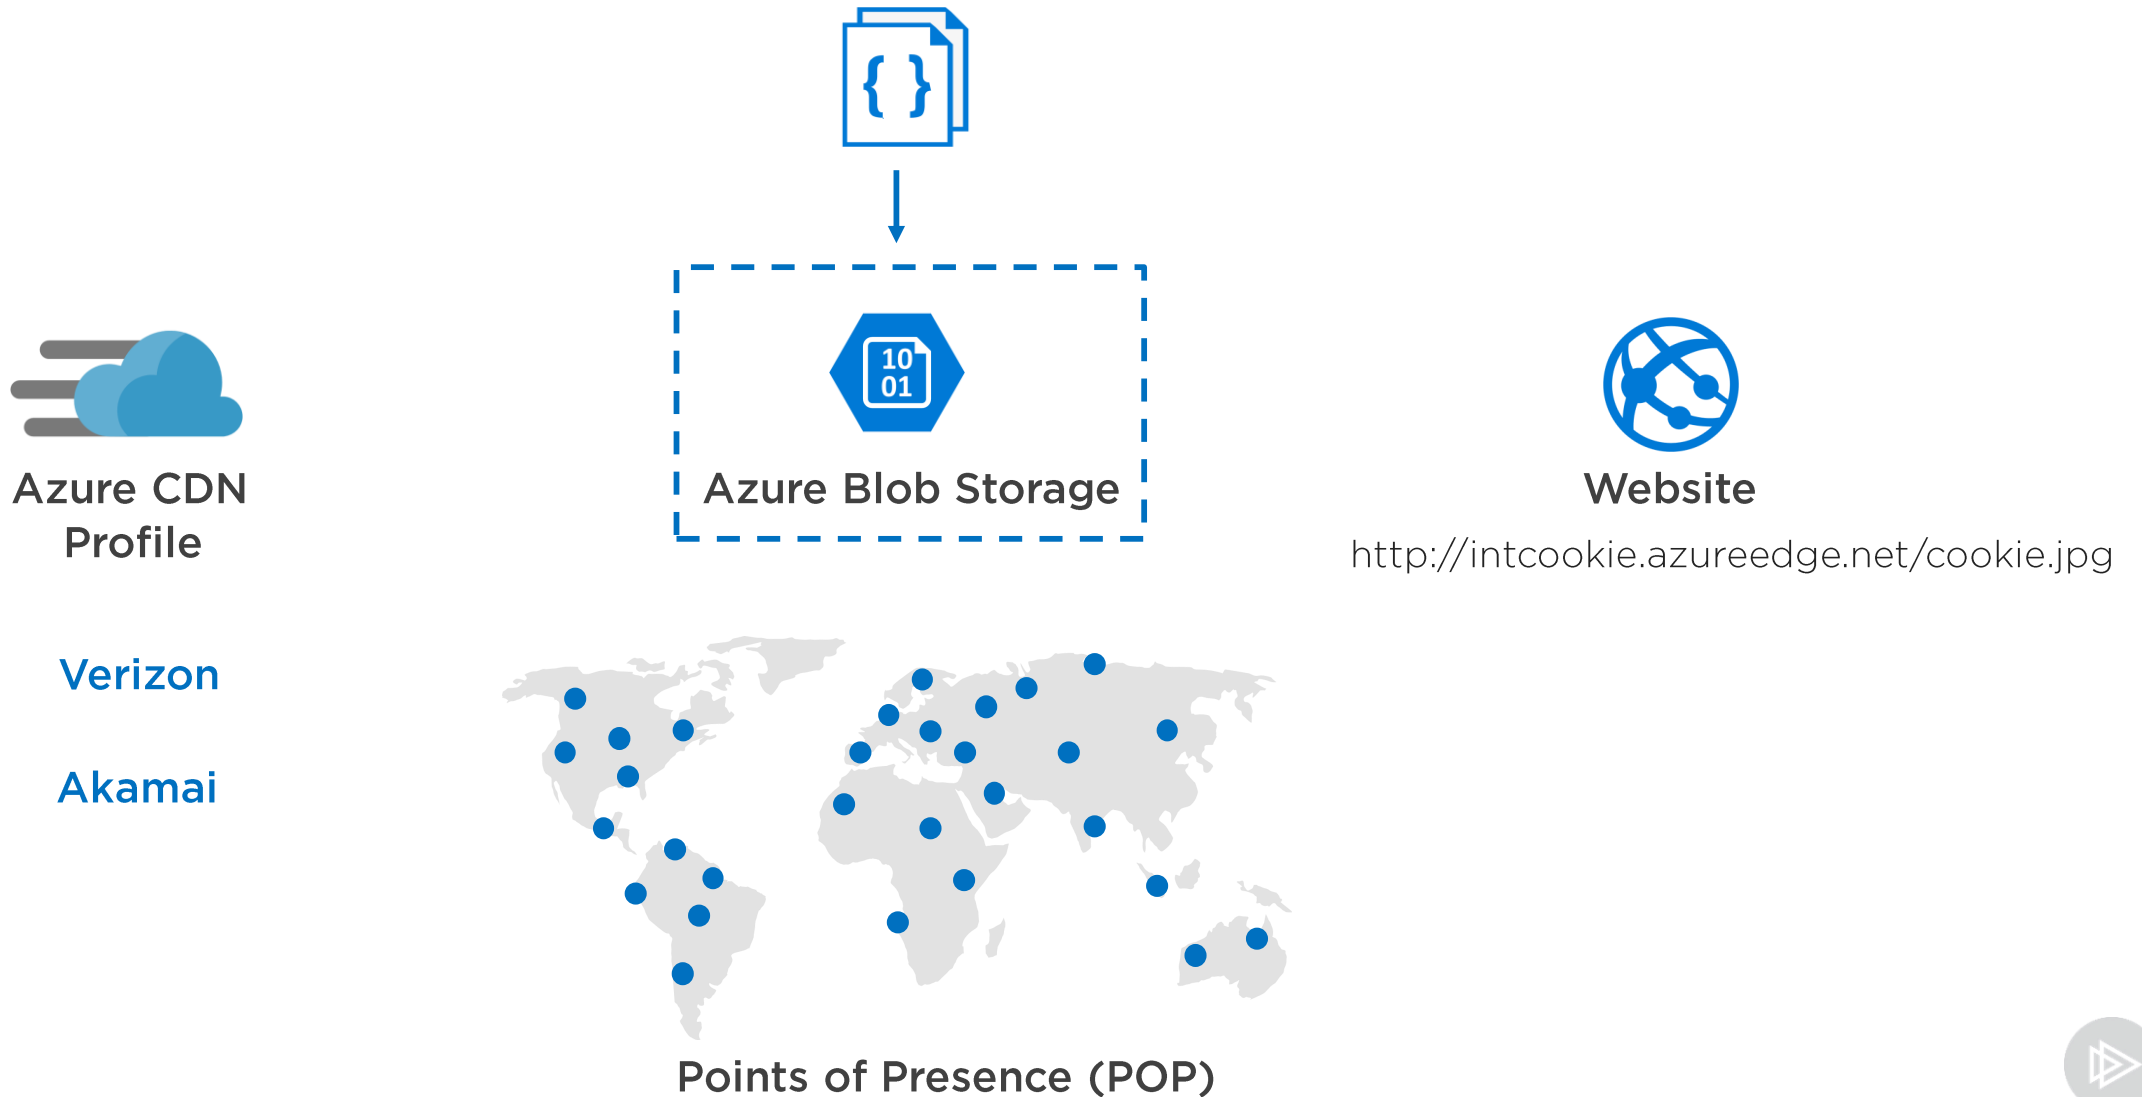

What is CDN?

What is CDN?

What is CDN?

Demo

CDN profile and endpoint

Visual Studio 2015

Azure Portal

Using Custom Domains and TLS

Custom Domains in Azure

Web App

URL

<http://internationalcookies.azurewebsites.net>

VIP (Virtual IP Address)

52.178.45.139

May change

- recreate Web App
- change to Free

Custom Domains in Azure

1

Change DNS at your domain registrar

2

Couple the domain to your Web App in Azure

Demo

Domain registrar

Azure Portal

TLS in Azure

Web App

URL

<http://internationalcookies.eu>

TLS in Azure

App Service Certificate

Azure Key Vault

Web App

[HTTPS://internationalcookies.eu](https://internationalcookies.eu)

Demo

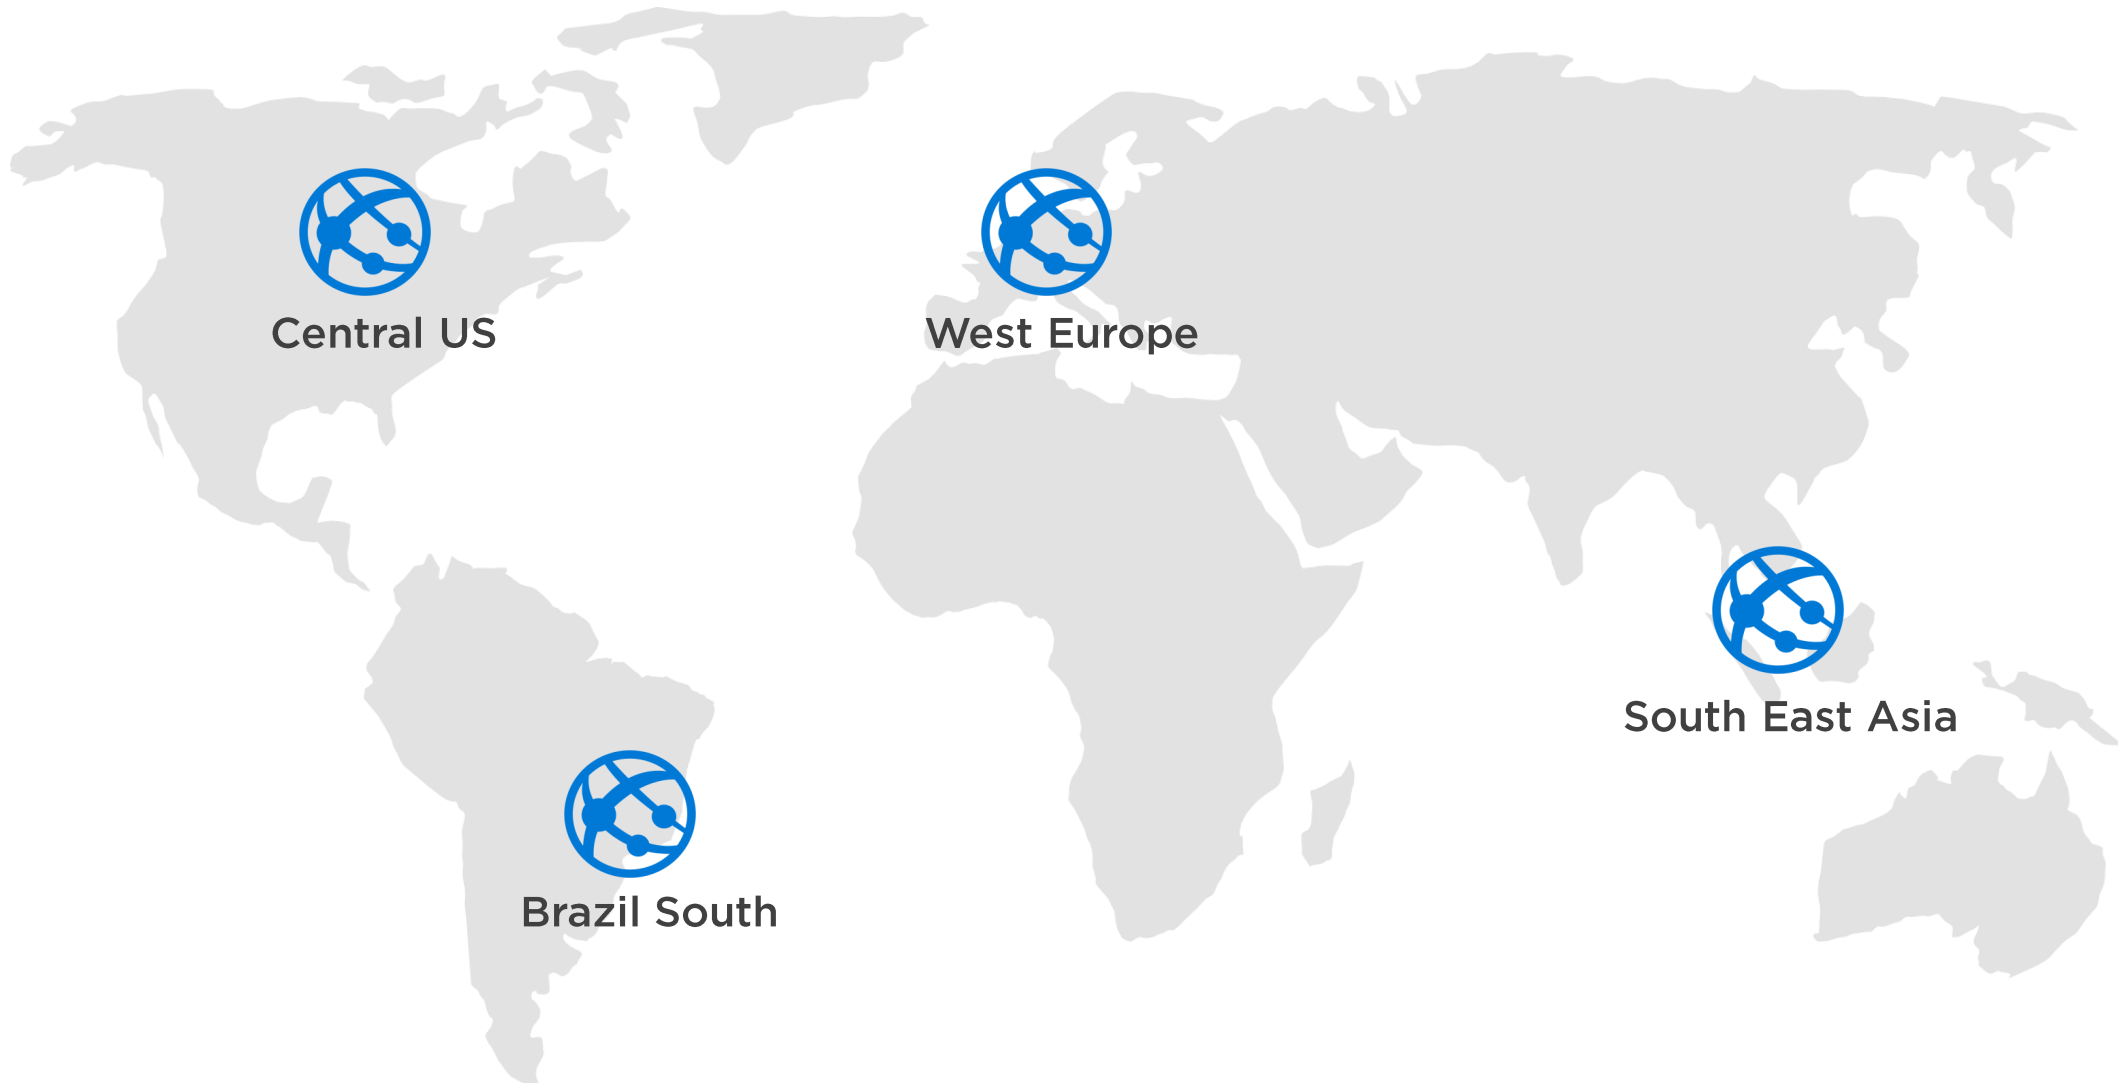

**Buy an App Service Certificate
Azure Portal**

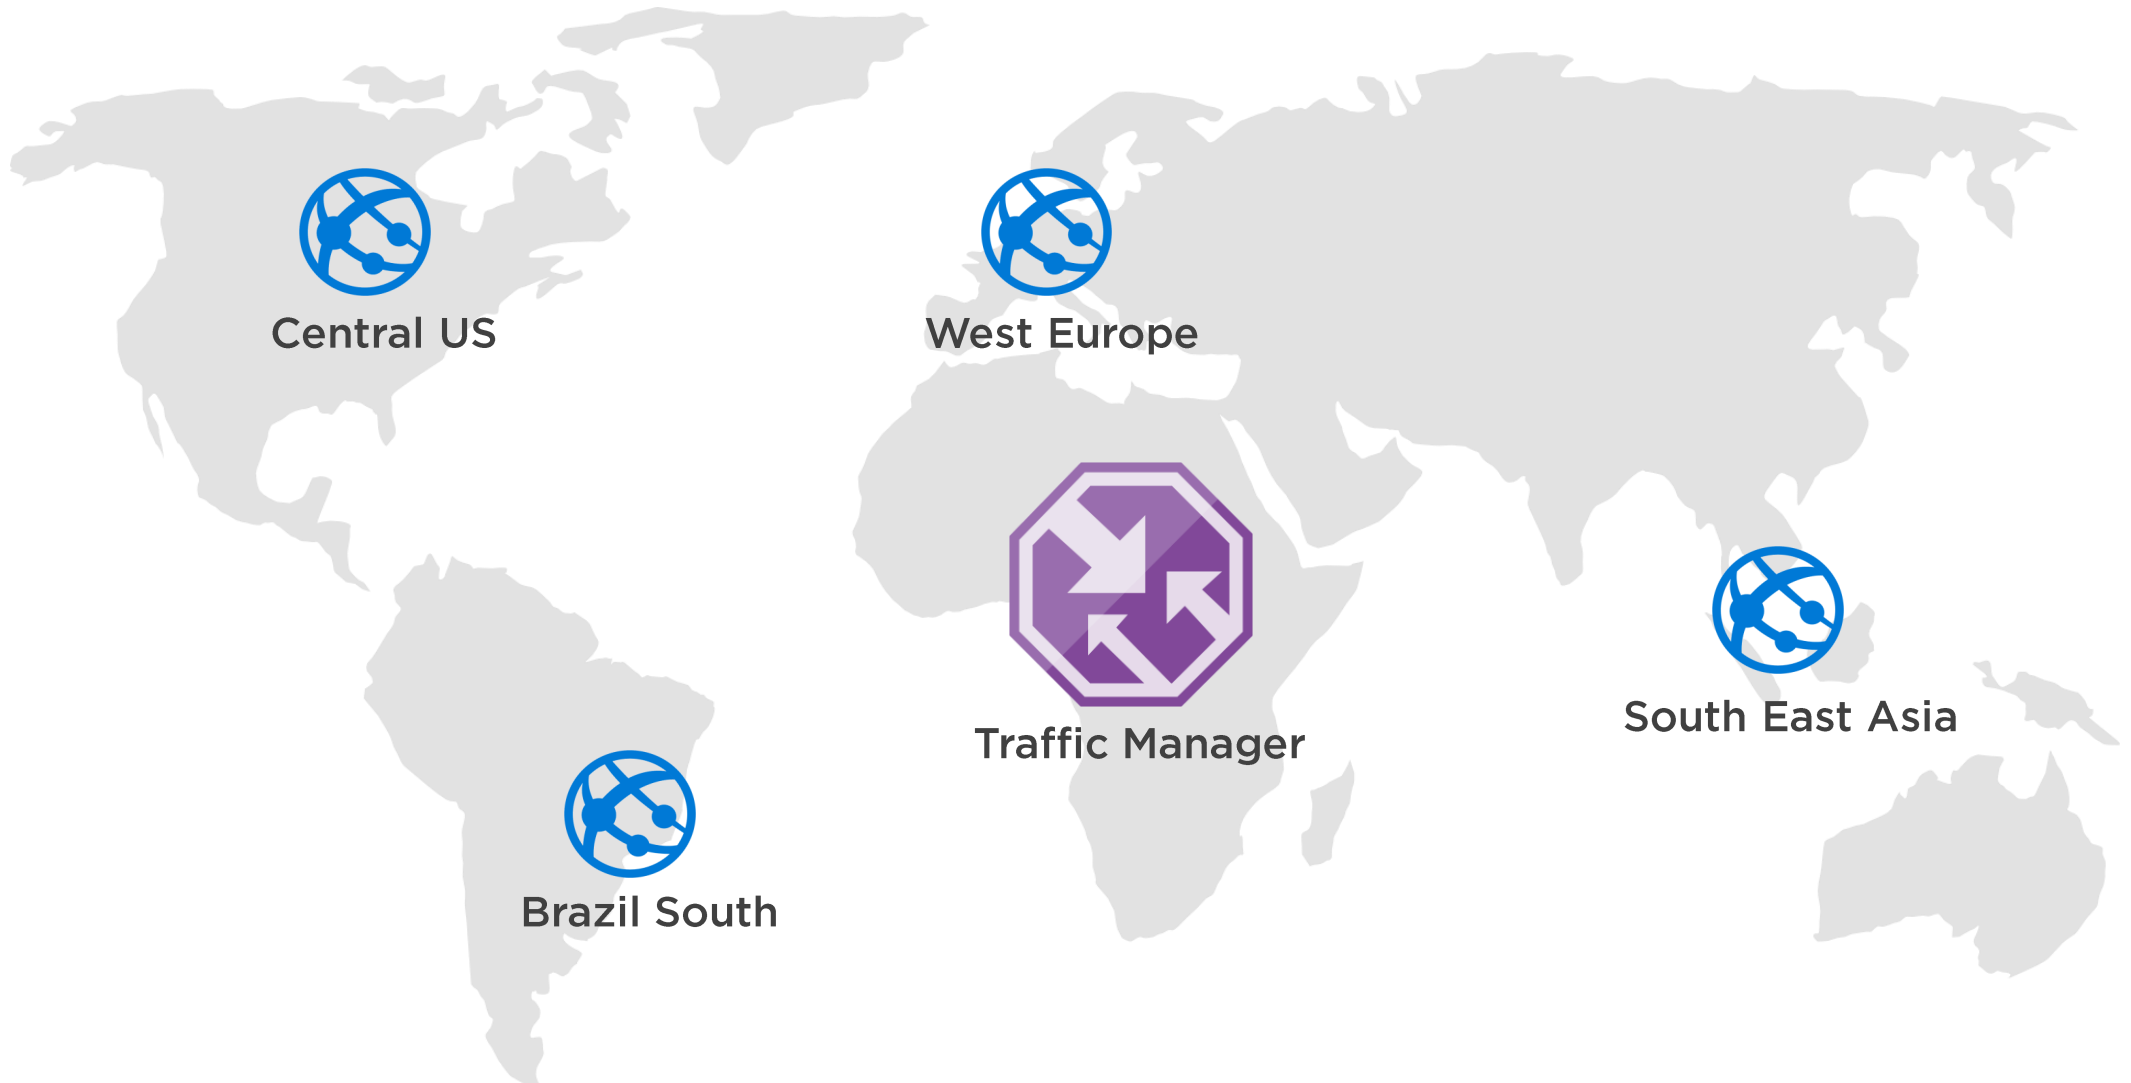

Global Scale with Azure Traffic Manager

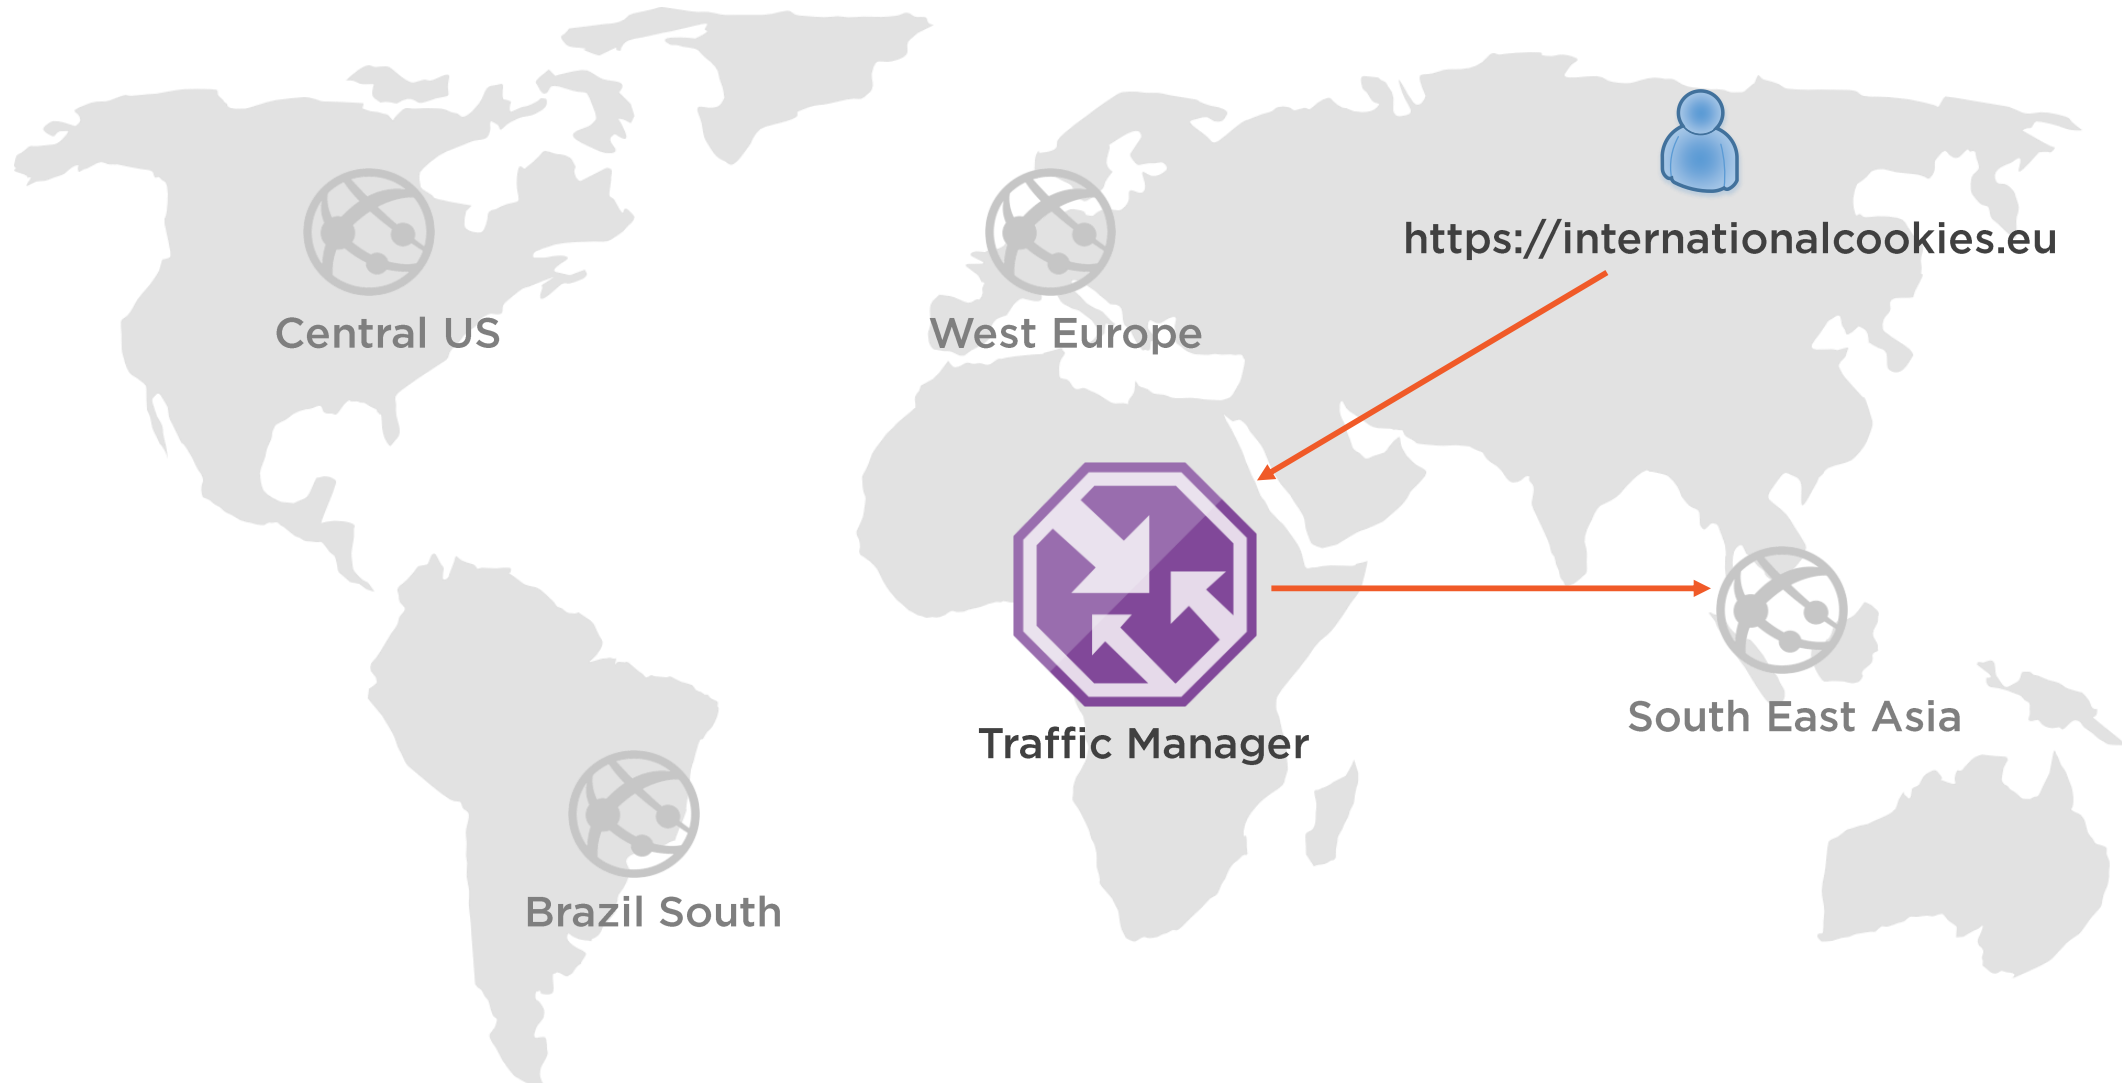

Traffic Manager
